Project Team Research: Agricultural Biodiversity

ALS 4914, Spring 2023

Gain hands-on experience exploring agricultural diversity in many forms!

In this class, students will work with the Field & Fork Program and community partner Working Food to design variety trials of interesting crops, and conduct field experiments at the Field & Fork farm, explore local and global diversified farming operations, create scientific reports and outreach materials to share about the journey, and work with the community and chefs to explore flavor profiles and preferences.

All majors are welcome.

Instructor:
Dr. Dina Liebowitz
Field & Fork Campus Food Program

Partners:
- Melissa Desa
  Community Programs Director, Working Food
- Dr. Charlie Messina, UF Horticultural Sciences

Class schedule:
- Tu Period 6 (12:50-1:40)
- Th Period 6-7 (12:50-2:45)

Note: Class will be a hybrid of synchronous online discussions, and in-person meetings at the Field & Fork Farm.
